## 1 General Instructions

The following pages represent the Invoicing, Receipt, Acceptance and Property Transfer (iRAPT) Data Element/Segment Cross Reference for the reporting information via EDI, into iRAPT, including UID information. The tables that follow present the usage of the Segments and data elements arrayed in Transaction Set Order. Only the Segments that iRAPT accepts are outlined below. The information represents 810P (Progress Payment) X12 transactions into Invoicing, Receipt, Acceptance and Property Transfer (iRAPT). The EDI Guide was created using the latest draft of the Implementation Conventions.

**NOTE:** If using a word processor program (i.e. Microsoft Word, WordPerfect, Microsoft WordPad, Microsoft Write, etc.) to create EDI files, then the text must first be cut/copied out of the word processor program and pasted into Microsoft Notepad, or another ASCII text editor and saved in the text editor, before sending the data to iRAPT. This converts the text to text-only format and removes control characters that contain formatting information.

### **Sending Attachments to iRAPT:**

**To send attachments to iRAPT that are related to an EDI transaction via SFTP, Vendors must use the attachment code "E9" (See REF Segment at Pos. 050) to associate the attachment with the transaction.**

**iRAPT provides Vendors the capability to manually FTP over attachments electronically. These attachments can then be referenced and attached to inbound EDI transactions. Please contact the Help Desk for assistance in setting up a directory on the FTP server to submit attachments using this method. Once set up with a directory, Vendors will need to FTP over their file as a separate action from submitting the EDI file. The attachment needs to be present on the server at the time the inbound EDI file is processed by iRAPT.**

**To send attachments to iRAPT via EDI, Vendors may also use the 841 EDI Transaction Set. Vendors may not use the 841 EDI Transaction Set for anything other than sending attachments.**

**Please refer to the EDI\_iRAPT\_Guide.doc for detailed EDI enveloping instructions for attachment data as only one document (i.e. one Transaction Set) can be transmitted with one 841 in an ISA/IEA when attachment data is submitted to iRAPT.**

**WARNING: Invoicing, Receipt, Acceptance and Property Transfer (iRAPT) is designated for Sensitive Unclassified information ONLY. Do NOT upload classified attachments into iRAPT.**

Website for detailed RFID information:

<http://www.acq.osd.mil/log/rfid/index.htm>

Each page includes the following:

1. Data Segment	X12 Segment
2. Description	X12 Name
3. Element	X12 Data Element Reference Number
4. Format & Min/Max	Specific to iRAPT, not ANSI X12
5. Requirements	Depicts whether the Segment is: <b>M</b> – Mandatory – Usage is required. <b>O</b> – Optional – Can be used or not used. <b>C</b> – Conditional – Contingent upon another criteria being met. (Field is not mandatory or optional, e.g. Extension Fields to Department of Defense Activity Address Codes (DoDAAC); use if a DoDAAC is present.)_See Notes Column for specific instructions. <b>N/A</b> – Not Allowed
6. iRAPT Notes	Contains notations of the Field’s usage or restrictions

Fields included within iRAPT display the “Type” Field depicting the value used.

- **Nv** Numeric Field where v = number of decimal positions, decimal implied (i.e. 300 will be read as 3.00)
- **R** Decimal number. If value includes decimal, then iRAPT requires decimal point and value be sent: iRAPT will NOT imply or assume decimal points.  
Examples:
  - 300 will be read into iRAPT as “300”
  - 3.00 will be read into iRAPT as “3”
  - 3.5 will be read into iRAPT at “3.5”
- **ID** Identifier
- **AN** Alphanumeric String
- **DT** All Date Fields use format CCYYMMDD
- **TM** All Time Fields use the format HHMMSS

**Notes:**

- Above and below each Segment there are notes pertaining to iRAPT. The values that iRAPT accepts are also noted. iRAPT ignores all codes not identified in this guide.
- The word “must” in a Segment Note implies that the Segment is mandatory. The word “may” in a Segment Note implies that this Segment is Conditional based on the terms of the contract or the needs of the contractor.
- 810P (PPR) does not allow One Pay, Navy ERP or EBS EDI transactions.

Notes below regarding foreign currency do not affect the Costs Worksheet; all amount fields for the Costs Worksheet must be in whole numbers without decimals.

- Currency codes that allow exactly two positions to the right of the decimal may be submitted via EDI.

Currency codes that allow greater than two positions to the right of the decimal may NOT be submitted via EDI.

Currency codes that allow zero or one position to the right of the decimal may be submitted via EDI, however, the following rules will be applied:

- When the amount field is defined as a numeric field (N2), the decimal positions must be submitted with one or two zeros as needed to meet the X12 requirement that exactly two decimals are required for N2 fields.
- When the amount field is defined as a decimal number field (R) or an alpha/numeric string (AN),
  - The system will pad zeroes to right of the decimal point up to the number of digits allowed for a Currency Code.
  - The system will drop zeroes to the right of the decimal point if they exceed the number of digits allowed for a Currency Code.
  - If a non-zero number is given to the right of the maximum number of allowable decimal places as specified by the Currency Code, an error will be given.

REF^ACC^Draft (Draft Indicator)

**Notes:**

- The attachment referenced by the “E9” code in the table above represents functionality whereby an attachment can be submitted independently and associated to a submitted EDI transaction. Vendors have the ability to have the SAM set up an attachment directory that will allow the vendor to submit attachments for EDI transactions directly to the FTP Server.
- The “Financial Information” referenced by this indicator (REF01=“1Z”) refers to Financial Information on the contractor, that is submitted independently of this request for payment. The indicator is used with two DTM segments to populate the following clause in the certification language on a progress payment request:
  - *SF1443: “(f) There has been no materially adverse change in the financial condition of the contractor since the contractor's ( DTM02, where DTM01=“270” ) submission of its last financial information dated ( DTM02 where DTM01=“600” ) to the Government in connection with the contract;”*
- If a REF segment with REF01=“1Z” is not used, iRAPT defaults the indicator value to “N”, and the two DTM segments are required.  
REF segment with REF01=“1Z” and REF02=“N” - the corresponding DTM segments are required.  
REF segment with REF01=“1Z” and REF02=“Y” - the corresponding DTM segments must not be entered.
- When EDI submissions are identified as a “Draft”, the system will process them inbound using the following minimal data set requirements:
  - Vendor CAGE
  - Contract Number Type (Defaults to DoD Contract (FAR) if not entered)
  - Contract Number
  - Delivery Order Number
  - Pay Official DoDAAC
  - Document Type
  - Routing DoDAACs depending on the document type and pay system

- Invoice/Shipment Number depending on the document type
- If any Line Item data is submitted, the Item No is mandatory
- NTE Segment (When FMS Shipment Number is used)
